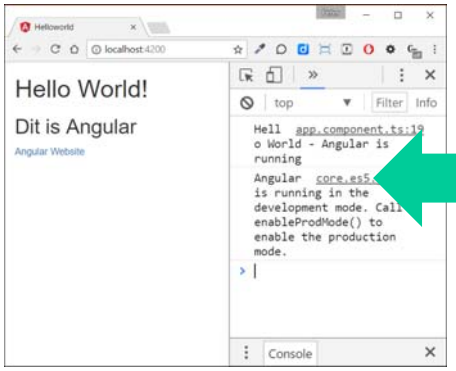
> ng new my-dream-app
> cd my-dream-app
> ng serve
Angular CLI
A command line interface for Angular
GET STARTED
ng new
The Angular2 CLI makes it easy to create an application that already works, right out of the box. It already follows our best practices!
ng generate
Generate components, routes, services and pipes with a simple command. The CLI will also create simple test shells for all of these.



main.ts / bootstrapper

ngModule / root module

AppComponent

Other components

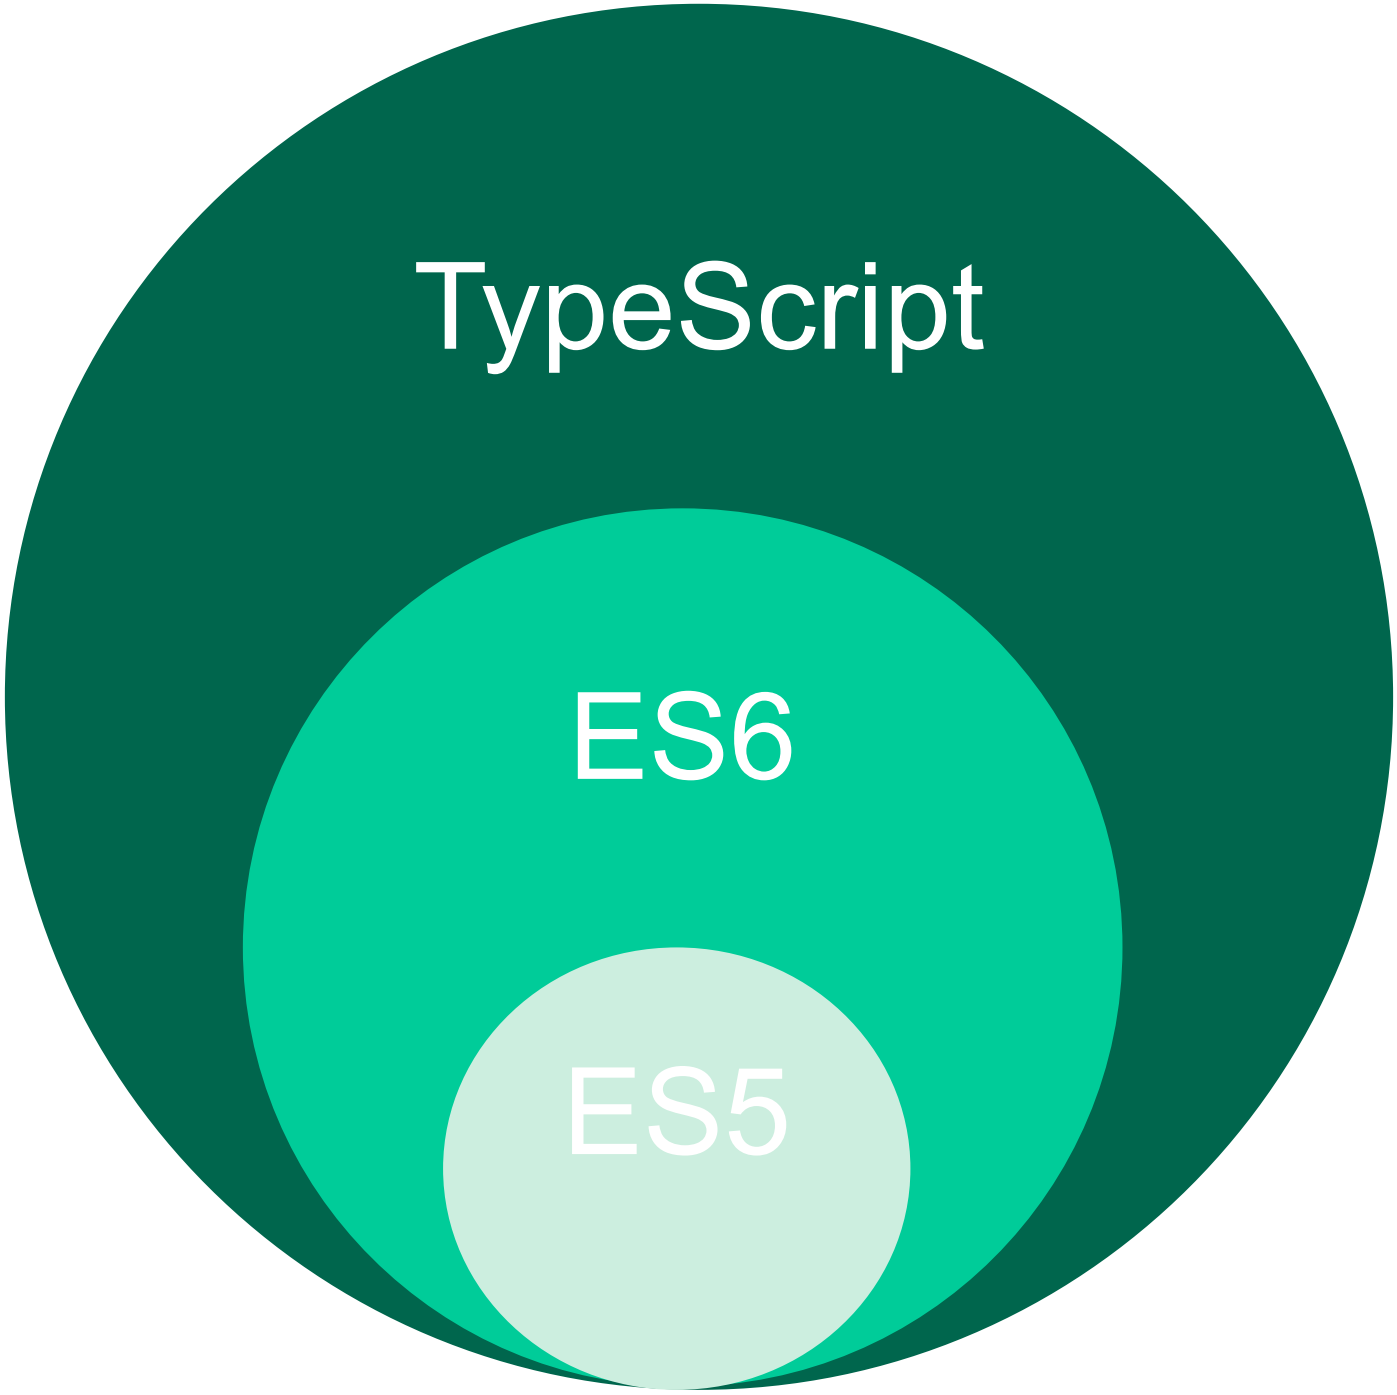
Other components

Other components

Services

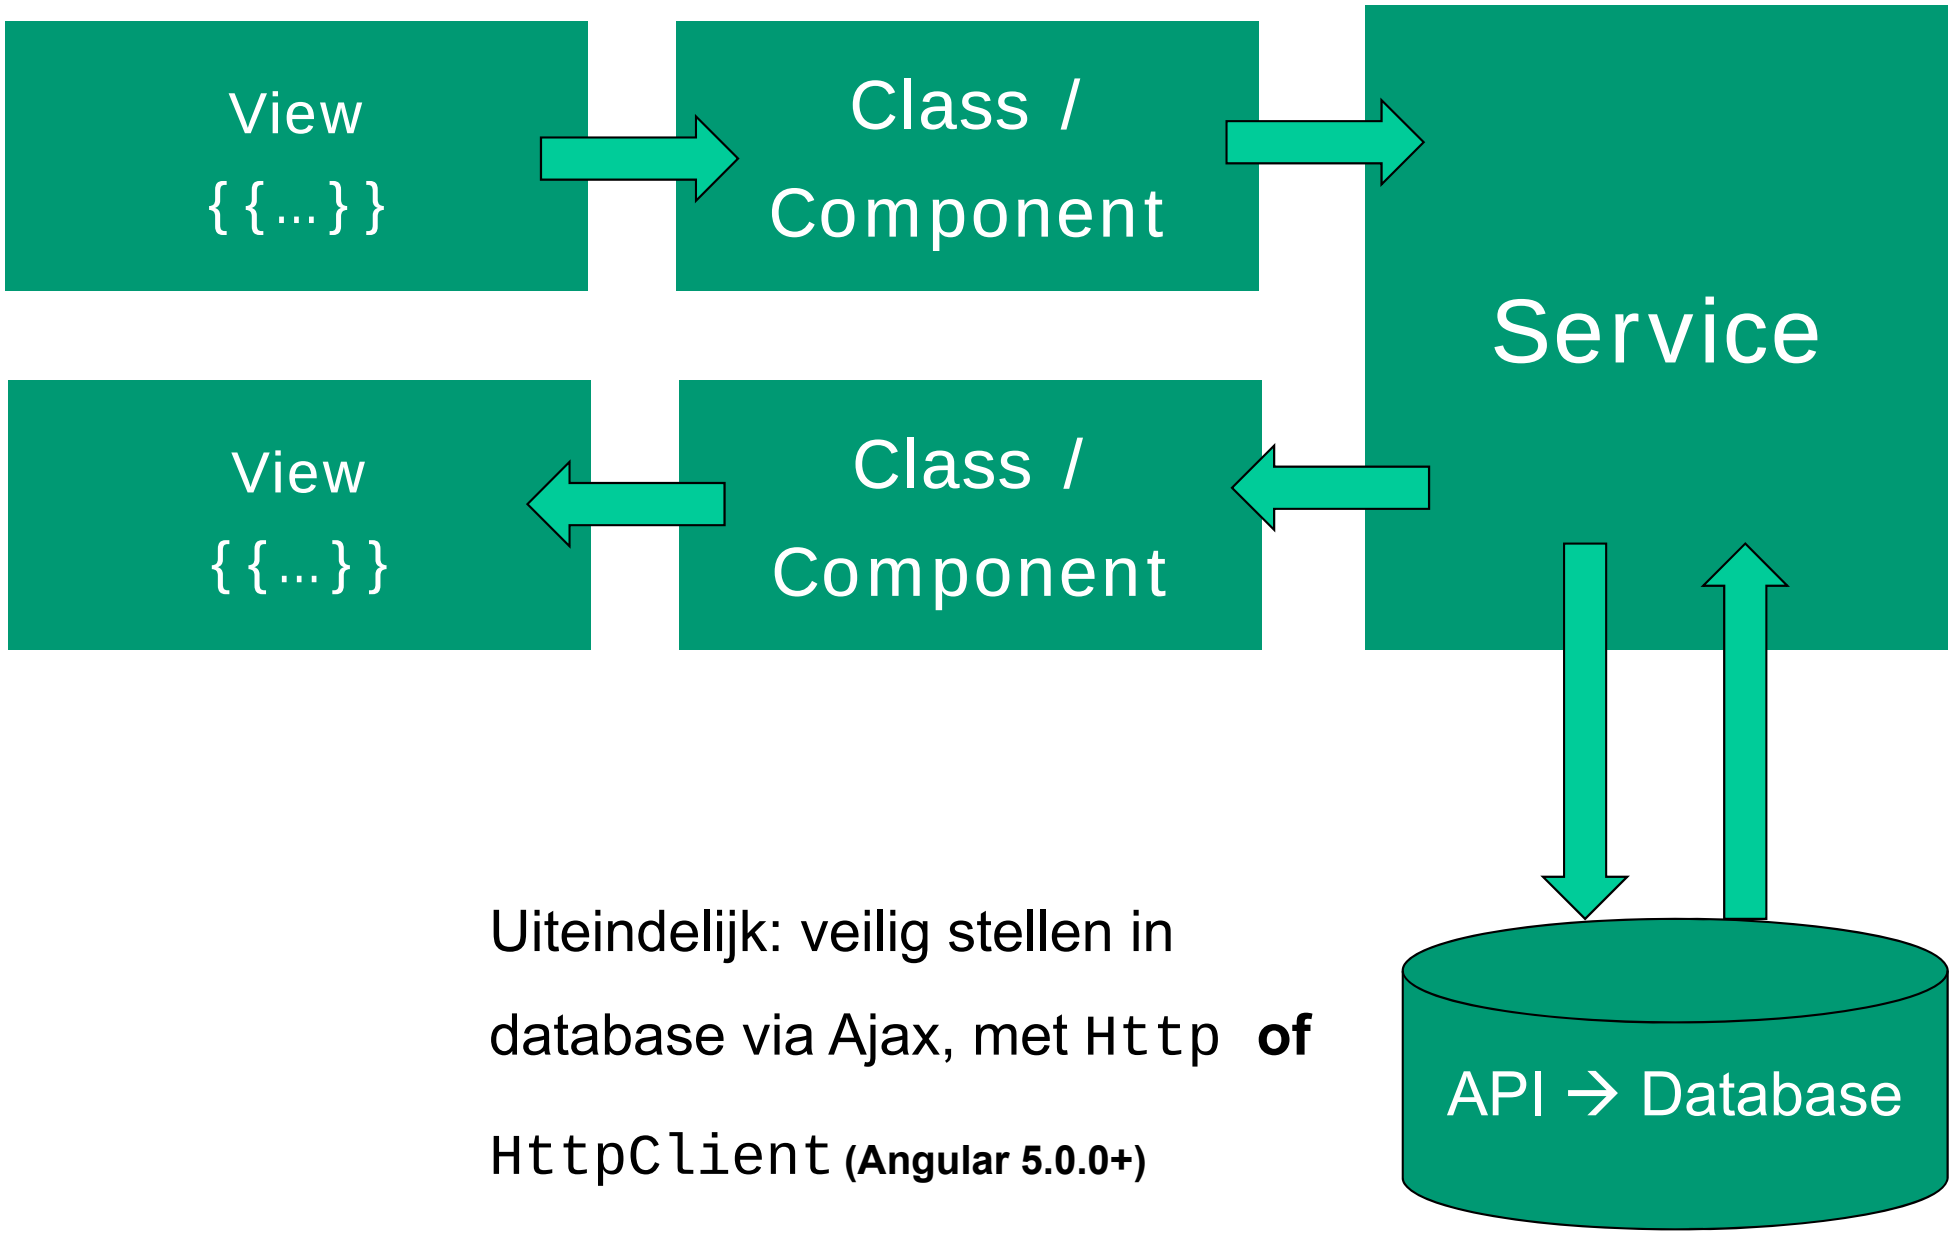
3rd party libs

Other modules



TypeScript
ES6
ES5

Data flow



Uiteindelijk: veilig stellen in database via Ajax, met `Http` **of** `HttpClient` **(Angular 5.0.0+)**

Next Steps

- Component Communication
- Event handling & Eventing services/buses with `Subject()`
- Routing
  - Angular 2 Component Router
  - Routing Parameters
- Forms
  - Template driven forms
  - Model driven forms

CONTENTS | PREREQUISITES | MORE DETAILS

- Angular applications with multiple modules
- Routing and Lazy loading
- Named router outlets
- Authentication and routing guards
- Advanced components - Content projection
- Unit testing with Jasmine en Karma
- The Smart Component/View component pattern
- State management with @ngrx/store
- Angular and Firebase
- Creating PWA's with Angular
- Using third party modules (Angular Material, Ionic, NG-bootstrap, etc)

Angular – Next Steps, Advanced

- Multiple Modules, lazy loading
- Authentication
- Advanced components
- Routing Guards & more routing
- State Management with @ngrx/store
- Realtime Databases with Firebase
- Testing
- Animation
- …
